

## **COURSE TITLE**

---

### **COMPUTER SYSTEMS VALIDATION (CSV)**

#### **Course Date**

24 May 2019

#### **Course Fee**

\$481.50 per pax (inclusive of GST)

#### **Course Duration**

9am to 5pm

#### **Course Venue**

Temasek Polytechnic

#### **Introduction**

Productivity can be increased/improved through computerization or use of IT systems in various manufacturing processes. This course will provide you with key issues in validation of computerized systems to help your company meet regulatory requirements and mitigate risks to achieve product quality and patient safety.

#### **Targeted Audience**

This course is designed for key Quality, IT or Operational Subject Matter Expert (SME) or Manager likely to be involved in using, validating, approving or purchasing computer systems.

#### **Course Outline**

- How do we define Computer Systems Validation (CSV)?
- Regulations and GMP standards related to DI and CSV – 21CFR Part 11, PIC/S Annex 11, and GAMP-5
- What do regulators look for in CSV compliance?
- Do I have computer systems that need to be validated?
